Improving knowledge on NPS and opiates trafficking in Europe

NARCO-MAP is a project focusing on Novel Psychoactive Substances (NPS) and opiates illicit criminal markets (with particular regards to *supply chain, trafficking routes from and to Europe, and related polycriminal activities*) because the boundary between the market categories of 'old' and new drugs is becoming harder to define, and important interdependencies between these two groups of substances are emerging.

NARCO-MAP wants to contribute at improving knowledge and expertise, in particular by **defragmenting relevant information/intelligence** and implementing innovative methods and technological tools to further collect, systemise, analyse and exploit them, with the intent also to improve detection, monitoring, investigative and prosecution capacities, and to facilitate cooperation/exchange of best practices among LEAs/relevant stakeholders.

Improving knowledge on NPS and opiates trafficking in Europe

Specific project objectives:

1. **improving the quantity/quality of the information/data available on NPS/opiates illicit criminal markets** by assessing the methods already used to collect, analyse and share them among key stakeholders in EU
2. **improving the capacity to generate operational knowledge on NPS/opiates illicit criminal markets** by defragmenting and systemize the information already existing.
3. **improving the actual knowledge/expertise on NPS/opiates illicit criminal markets** by using innovative interdisciplinary and mixed-methods to analyse the information/data available.
4. **Improving networking, cooperation, information sharing and the exchange of best practices among key stakeholders in Europe** (and possibly with third countries), by exploiting web-based technological solutions
